

Mohamed Ben Naima

Full-Stack Developer | JavaScript · Angular · React · Node.js

Tunisia | +216 25 577 542 | Medbennaima2021@gmail.com | [linkedin.com/in/mohamed-ben-naima](https://www.linkedin.com/in/mohamed-ben-naima) | github.com/Mohamed-Ben-Naima | [Portfolio: mohamed-ben-naima.netlify.app](https://mohamed-ben-naima.netlify.app) | English (bilingual) | French (bilingual)

PROFILE

Full-stack developer graduating June 2027 (ESPRIM, Cybersecurity & Cloud Computing, top of class). Two internships behind me: a production industrial ERP (**Java/Spring Boot + Angular** + MySQL + Keycloak) at Polymaille, and at Alfa Computers a Python (FastAPI) trading backend plus a complete MERN e-commerce. I work across **web, desktop and mobile** — Angular, React, Node.js, JavaFX, React Native — and I'm comfortable with SQL (MySQL, PostgreSQL, MongoDB) and Git-based workflows. I write the tests, the docs, and ship with CI/CD.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, Java, PHP, SQL

Frontend: Angular, React, React Native, Tailwind CSS, HTML/CSS

Desktop: JavaFX

Backend & APIs: Node.js/Express, Spring Boot, FastAPI, Symfony, REST, Swagger/OpenAPI

Databases: MySQL, PostgreSQL, MongoDB, Oracle

Auth & Security: JWT, OAuth2, RBAC, Keycloak

Cloud & DevOps: Docker, GitLab CI/CD, GitHub Actions, Kubernetes, OpenStack, AWS, Render

Methods & Tools: Agile (SCRUM / KANBAN), Git, Postman, Jira, UML, technical documentation

Networking: Cisco switching, pfSense, VLANs, DNS/DHCP, Wireshark

Observability: Grafana, Prometheus, Loki, Wazuh, Kafka

OS: Ubuntu, Kali, Windows Server

EXPERIENCE

Software Engineering Intern — Full-Stack, Polymaille (Textile Industry) | Ksar Hellal, Tunisia · Jul – Sep 2026 (present)

- **Building a full-cycle ERP for Microtiss Confect** as a Spring Boot Modulith with an **Angular frontend** — covering purchase, stock, production and sales — supplier orders, approval workflow, delivery notes, invoices and payments, with deployment in progress on a team-configured Windows Server.
- **Designed the MySQL relational model & REST API**, enforcing data integrity and security through role-based access control (RBAC); warehouse, production and finance teams share the same data with granular permissions.
- **Wrote the test suites (Postman) and technical documentation** before each delivery; scoped every module end-to-end with the business lead in short iterations.

Full-Stack / Backend / Mobile Developer, Alfa Computers | Mahdia, Tunisia · Mar 2024 – Aug 2025 (PFE, IoT mobile, backend internships)

- **Built "The Hive"** trading platform backend, **serving** the web client through fully authenticated REST endpoints, **by** implementing FastAPI (Python), JWT + OAuth2, OpenAPI/Swagger and Postman test suites.
- **Delivered a complete MERN e-commerce** solo (React, Node.js, Express, MongoDB) with JWT login, catalog, cart, customer/admin dashboards, **by** containerizing with Docker and automating deploys via GitLab CI/CD to Render.
- **Led a 3-person team** (2 mobile developers + 1 IoT/hardware) to ship a smart-home app (React Native + Node.js/Express) streaming live Arduino sensor data and controlling LEDs from the phone, deployed on Render.

PROJECTS

MiraviaSpace — Travel & Social Platform (2025, team of 6) — Symfony (web) · JavaFX (desktop) · Oracle · In-house AI chatbot (MiraBot)

- **Owned the entire client side:** account creation/login, client dashboard, search across flights/hotels/offers, and local-immersion flows (volunteering, events, activities) — delivered as both a Symfony web app and a JavaFX desktop client.
- **Runner-up, ESPRIT Projects Ball** (nominated by ESPRIM).

Secured Banking Infrastructure (2026) — microservices · Spring Boot · Angular · Keycloak · SQL/MySQL · Kafka · GNS3 · OpenStack

- **Architected a microservices banking app** (Spring Boot, Angular, Keycloak, SQL/MySQL — one database per service) on an OpenStack private cloud inside GNS3, with Kafka async eventing and CI/CD.
- **Conceived the secured network architecture:** Cisco core switch, dual pfSense firewalls, edge router, VLAN segmentation, DNS/DHCP; observability with Grafana, Prometheus, Loki, Wazuh. **Nominated, ESPRIT Projects Ball.**

Hermes — E-commerce Platform (MERN) (2024 – present) — React · Node.js · Express · MongoDB · Render

Full MERN e-commerce — product catalogue, cart, checkout, orders, PDF invoices — built at ISIMa, now being matured into a multi-tenant SaaS with an enhanced user/admin experience.

Windows Server & Network Services Lab (academic) (2026) — Windows Server · Active Directory · Kerberos

Configured Windows Server roles — FTP, DNS, DHCP — with Kerberos-based authentication/authorization and granular file permissions.

EDUCATION

ESPRIM Monastir — Engineering Degree, Cybersecurity & Cloud Computing (2024 – present) · top of class

ISIMa Mahdia — BSc, Software Engineering (2021 – 2024) · with highest honours

Lycée Tahar Sfar, Mahdia — Baccalauréat in Mathematics (2021 – 2022)

CERTIFICATIONS

Cisco CCNA 200-301 (in progress) | CLLMSP & CRTOM (Red Team Leaders, 2026) | Full-Stack MERN (100h) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation

LANGUAGES

Arabic — native | **French** — bilingual | **English** — bilingual | **German** — basic

LEADERSHIP & BEYOND WORK

- Co-founded **Hunters Club** (20+ members) — CTFs across Tunisia; 2nd & 4th place at Polytech Sousse CTF; ran an n8n automation workshop for students.
- Led the Cyber & Cloud committee at **DevTalents** (30+ members) — organized an LPIC-1 preparation session.
- **2nd place**, Clean & Green hackathon 2025 — regular hackathon participant across Tunisia.
- Earlier jobs: lifeguard (Mouradi hotel), barista, waiter, construction worker — teamwork and calm under pressure.
