PROFILE

Full-stack software engineer specialized in secure backend architecture, relational data modeling, and containerized deployment. Scored 18/20 on a microservices banking platform (team of 5) and built a production ERP alongside a teammate during my engineering internship. Seeking to apply software engineering and security skills in an international fintech environment.

TECHNICAL SKILLS

Frontend: Angular, React, React Native, Tailwind CSS, HTML/CSS, JavaFX
Backend: ASP.NET Core, Spring Boot, FastAPI, Node.js/Express, Symfony, Laravel, REST, Swagger/OpenAPI
Languages: C#/.NET, Python, JavaScript/TypeScript, Java, PHP, SQL
Databases: SQL Server, PostgreSQL, MySQL, MongoDB, Oracle, Entity Framework Core
Auth & Security: JWT, OAuth2, RBAC, Keycloak, password hashing, antiforgery tokens
Testing: xUnit, unit testing, integration testing, Postman test suites
DevOps: Docker, Kubernetes, GitLab CI/CD, GitHub Actions, OpenStack, AWS, Render
Architecture: Modular monolith (Spring Modulith), microservices, event-driven (Kafka), SOLID, Clean Code
Observability: Grafana, Prometheus, Loki, Wazuh | **Networking:** Cisco, pfSense, VLANs, Wireshark

EXPERIENCE

Software Engineering Intern - Full-Stack Jul 2026 - Sep 2026 (present)
[Polymaille \(Textile Industry\)](#), Ksar Hellal, Tunisia

- Building a full-cycle ERP as a Spring Boot Modulith for Microtiss Confect - purchase, stock, production and sales - one trusted source of truth across four business cycles, deployed on Windows Server.
- Designed the relational model and REST API, enforcing data integrity through RBAC; warehouse, production and finance teams share the same data with granular permissions.
- Owned scoping end-to-end with the business lead: every module framed with the user and validated before delivery.

Technical skills: Java, Spring Boot, Spring Modulith, MySQL, Keycloak, OAuth2, RBAC, Angular, Tailwind CSS, Redis

Full-Stack / Backend / Mobile Developer Mar 2024 - Aug 2025
[Alfa Computers, Mahdia, Tunisia](#) (3 internships: PFE, IoT mobile, backend)

- Built The Hive trading platform backend: FastAPI, JWT + OAuth2, OpenAPI/Swagger, Postman test suites.
- Delivered a complete MERN e-commerce platform (React, Node.js, Express, MongoDB) with JWT auth, catalog, cart, dashboards - containerized with Docker, CI/CD via GitLab to Render.
- Led a 3-person team to ship a smart-home app (React Native + Node.js/Express) streaming live Arduino sensor data, deployed on Render.

Technical skills: Python, FastAPI, React, Node.js, Express, MongoDB, React Native, Docker, GitLab CI/CD, JWT, OAuth2

PROJECTS

Secured Banking Infrastructure (2026) 18/20, Nominated ESPRIT Projects Ball
Spring Boot | Angular | Keycloak | SQL/MySQL | Kafka | OpenStack | GNS3 | AWS

- Conceived a secured network architecture: Cisco core switch, dual pfSense firewalls, VLAN segmentation, DNS/DHCP.
- Architected a microservices banking app on OpenStack private cloud inside GNS3, with Kafka async eventing and CI/CD (JAR auto-deploy).
- Observability with Grafana, Prometheus, Loki, Wazuh; KYC module with JWT/RBAC.

DAB Banking System - Automated Teller Machine (2026)
ASP.NET Core 8 | Entity Framework Core | SQL Server | JWT | Docker | xUnit (36 tests)

- Built a multi-tier banking application: Web API (JWT auth, RFC-7807 problem details, Serilog) + MVC portal (ASP.NET Identity, cookie auth).
- Implemented transaction engine with ACID compliance, PIN hashing, daily withdrawal limits, card management, fraud dispute workflow with automatic refunds.
- 36 xUnit tests (SQLite in-memory), CI/CD (GitHub Actions), Docker + docker-compose deployment.

Hermes Suite - E-commerce Platform (2024 - present) With Highest Honours
React | Node.js | Express | MongoDB Atlas | Render | Netlify

- Full MERN e-commerce platform - catalogue, cart, checkout, orders, PDF invoices - now being matured into a multi-tenant SaaS.

MiraviaSpace - Travel & Social Platform (2025) Runner-up, ESPRIT Projects Ball
Symfony | Oracle | JavaFX | In-house AI chatbot (MiraBot) | Team of 6

- Owned the entire client side: account creation/login, dashboard, search across flights/hotels/cars/offers, and local-immersion flows.

EDUCATION

- ESPRIM Monastir** - Engineering Degree, Cybersecurity & Cloud Computing (2024 - present) - top of class
- ISIMa Mahdia** - BSc, Software Engineering (2021 - 2024) - with highest honours
- Lycee Tahar Sfar, Mahdia** - Baccalaureat in Mathematics (2021 - 2022)

CERTIFICATIONS

CLLMSP and CRTOM (Red Team Leaders, 2026) | Cisco CCNA 200-301 (in progress) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation
