Subject: Application — Leaders of Tomorrow Graduate Programme 2026

Dear Hiring Team,

As a recent engineering graduate in Cybersecurity & Cloud Computing from ESPRIM (GPA: 3.05/4.0), I am actively exploring career opportunities that combine technology, strategy and cross-functional exposure. The Leaders of Tomorrow Graduate Programme at Dubai Holding immediately caught my attention — the 12-month rotational structure across real estate, hospitality, media and investment is exactly the kind of transformative experience I am looking for.

Throughout my studies, I have built a strong technical foundation: I developed a full ERP system from scratch (Spring Boot, Docker, Keycloak), designed a secure banking infrastructure with a complete SOC environment (Wazuh, Grafana, pfSense), and led a team of three to deliver a real-time IoT mobile application. These projects taught me how to scope requirements, coordinate sprints, communicate with stakeholders and deliver under pressure — skills that translate directly into a graduate programme environment.

What draws me to Dubai Holding is the diversity of your portfolio and your commitment to developing future leaders through mentorship and real-world projects. I am particularly interested in how technology drives operational excellence across sectors like hospitality, real estate and media — and I am eager to learn from experienced leaders while contributing my analytical mindset and technical curiosity.

I am fluent in French and English, comfortable working in multicultural teams, and motivated by challenges that push me outside my comfort zone. This programme represents a unique opportunity to grow, explore different career paths and build a meaningful foundation for my professional journey.

Thank you for considering my application. I would welcome the opportunity to discuss how my background and motivation align with your programme.

Sincerely,

Mohamed Ben Naima
