

MB

Mohamed Ben Naima

Software Engineering Student
Java · Python · Distributed Systems

SKILLS

Languages — Java, Python, TypeScript/JS, SQL

Backend & Systems — Spring Boot, FastAPI, Node.js/Express, REST, OpenAPI

Performance & Eventing — Redis, Caffeine, Kafka, event-driven design

Data — MySQL, PostgreSQL, MongoDB, modeling

Infrastructure — Docker, Kubernetes, AWS, OpenStack, GitLab CI/CD

Systems & Networks — Linux, Windows Server, TCP/IP, VLANs, Cisco (CCNA in progress)

Observability — Grafana, Prometheus, Loki, Wazuh

EDUCATION

ESPRIM Monastir — Engineering, Cybersecurity & Cloud Computing
2024 – 2027 · top of class · Graduating June 2027

ISIMa Mahdia — BSc, Software Engineering
2021 – 2024 · with highest honours

LANGUAGES

Arabic — native

French — bilingual

English — bilingual

German — basic

CERTIFICATIONS

Cisco CCNA 200-301 (in progress)

CLLMSP · CRTOM (Red Team Leaders)

Building AI Agents (DeepLearning.AI)

LEADERSHIP

Co-founder, **Hunters Club** (20+); 2nd & 4th, Polytech Sousse CTF

Cyber & Cloud lead, **DevTalents** (30+)

2nd place, Clean & Green hackathon 2025

Open to **relocating to Amsterdam** for the 2027 internship and to **joining Optiver full-time after graduation** (June 2027).

PROFILE

Engineering student graduating **June 2027**, focused on backend, distributed and event-driven systems. As an intern at Polymaille I am building a full-cycle industrial ERP on Spring Boot — owning the Stock & Sales modules end-to-end with Redis/Caffeine caching and event-driven decoupling. Previously I built a **trading-platform backend** and a microservices banking architecture with Kafka and CI/CD. Analytical, competitive-mindset problem solver (CTFs, hackathons), at home in Java and Python. Eager to apply engineering to financial markets — and to grow into a full-time role with Optiver after graduation.

EXPERIENCE

Software Engineering Intern — Full-Stack, Polymaille (Textile Industry) Jul – Sep 2026 (present)

Ksar Hellal, Tunisia · 2-person team · industrial ERP for Microtiss Confect

- Building a full-cycle ERP as a **Spring Boot Modulith** — five domain modules sealed behind API boundaries, decoupled through application events; own the **Stock & Sales** modules end-to-end (domain model, event flows, REST APIs).
- Implementing **OAuth2/JWT + RBAC** (Keycloak), MySQL (Aiven), **Redis + Caffeine caching**, OpenAPI/Swagger and PDF invoicing with an Angular + Tailwind frontend; deployment in progress on a Windows Server we configured.

Backend / Full-Stack Developer, Alfa Computers Mar 2024 – Aug 2025

Mahdia, Tunisia · PFE + backend + IoT-mobile internships

- Built "**The Hive**" **trading-platform backend** — authenticated REST endpoints in FastAPI (JWT + OAuth2, OpenAPI/Swagger, Postman test suites).
- Delivered a **MERN e-commerce** solo (React, Node.js, Express, MongoDB) — Dockerized, GitLab CI/CD to Render.
- Led a 3-person team shipping a smart-home app streaming live Arduino sensor data (React Native + Node.js/Express).

PROJECTS

Secured Banking Infrastructure (2026) — GNS3 · Cisco · OpenStack ·

Spring Boot · Angular · Kafka · Wazuh · Grafana

Microservices banking app (Spring Boot, Angular, Kafka — one database per service) on an OpenStack private cloud; CI/CD JAR auto-deploy + AWS golden-image pipeline; observability with Grafana, Prometheus, Loki, Wazuh; KYC module in JWT/RBAC. **Nominated, ESPRIT Projects Ball.**

Hermes — MERN E-commerce Platform (2024 – present) — React ·

Node.js · MongoDB · Docker

JWT authentication, customer/admin dashboards and PDF invoices; being matured into a multi-tenant SaaS.

Windows Server & Network Services Lab (2026) — Active Directory ·

Kerberos

Configured Windows Server roles (FTP, DNS, DHCP) with Kerberos authentication and granular file permissions.

Availability: full-time for the 10-week 2027 internship in Amsterdam; prepared to begin full-time work with Optiver immediately upon graduation (June 2027).
