

Mohamed Ben Naima

Software Engineer — Backend, Cloud & Distributed Systems | Engineering Student

Tunisia | +216 25 577 542 | Medbennaima2021@gmail.com | [linkedin.com/in/mohamed-ben-naima](https://www.linkedin.com/in/mohamed-ben-naima) | github.com/Mohamed-Ben-Naima | [Portfolio: mohamed-ben-naima.netlify.app](https://mohamed-ben-naima.netlify.app) | English (bilingual) | French (bilingual)

PROFILE

Engineering student focused on backend, cloud-native and distributed systems. As an engineering intern I am building a full-cycle industrial ERP (Spring Boot Modulith) — owning modules end-to-end from domain model to REST APIs, with Redis caching, MySQL (Aiven), OAuth2/JWT + RBAC and an Angular frontend, now preparing deployment on a team-configured Windows Server. Prior experience: a MERN e-commerce platform, a FastAPI trading backend, and a microservices banking application deployed on an OpenStack private cloud with Kafka, observability and CI/CD. Solid foundations in data structures, algorithms and object-oriented design; comfortable with AWS, Docker, Kubernetes and Git-based workflows; motivated by ownership and operational excellence.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript/TypeScript, PHP, SQL
Backend & APIs: Spring Boot, FastAPI, Node.js/Express, Symfony, REST, OpenAPI/Swagger
Distributed & Messaging: Spring Modulith, Kafka, Redis, Caffeine
Data: MySQL, PostgreSQL, MongoDB, Oracle, data modeling
Cloud & DevOps: AWS, OpenStack, Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Render
Frontend: Angular, React, Tailwind CSS, HTML/CSS
Observability: Grafana, Prometheus, Loki, Wazuh
Tools: Git, Jira, Postman, UML

WORK EXPERIENCE

Software Engineering Intern — Full-Stack, Polymaille (Textile Industry) | Ksar Hellal, Tunisia · July – September 2026 (present)

- **Building a full-cycle industrial ERP** architected as a **Spring Boot Modulith** — five domain modules sealed behind API boundaries and decoupled through application events; own the Stock & Sales modules end-to-end (domain model, event flows, REST APIs).
- **Implementing OAuth2/JWT + RBAC** (Keycloak), MySQL (Aiven), Redis + Caffeine caching, OpenAPI/Swagger and PDF invoicing with an Angular + Tailwind frontend; deployment in progress on a team-configured Windows Server.
- **Working in a 2-person team** alongside the Purchasing & Production owner, documenting every module with the business lead before delivery.

Full-Stack / Backend / Mobile Developer, Alfa Computers | Mahdia, Tunisia · March 2024 – August 2025 (PFE, IoT mobile, backend internships)

- **Built "The Hive"** trading platform backend with fully authenticated REST endpoints (FastAPI, JWT + OAuth2, OpenAPI/Swagger, Postman test suites).
- **Delivered a complete MERN e-commerce** solo (React, Node.js, Express, MongoDB) with JWT login, customer/admin dashboards, Docker and GitLab CI/CD deployments to Render.
- **Led a 3-person team** (2 mobile + 1 IoT/hardware) shipping a smart-home app (React Native + Node.js/Express) streaming live Arduino sensor data, deployed on Render.

PROJECTS

Secured Banking Infrastructure (2026) — GNS3 · Cisco · OpenStack · Spring Boot · Angular · Kafka · pfSense · Wazuh · Grafana · Prometheus · Loki · GitHub Actions · AWS

- **Deployed a microservices banking app** (Spring Boot, Angular, Kafka — one database per service) on an OpenStack private cloud inside GNS3.
- **CI/CD pipelines** (JAR-to-server auto-deploy, AWS golden-image to OpenStack VM) plus observability with Grafana, Prometheus, Loki and Wazuh; KYC module in JWT/RBAC. **Nominated, ESPRIT Projects Ball.**

Hermes Suite — E-commerce Platform (MERN) (2024 – present) — React · Node.js · Express · MongoDB · Docker · Render

Full MERN e-commerce with JWT authentication, customer/admin dashboards and PDF invoices, being matured into a multi-tenant SaaS.

Windows Server & Network Services Lab (2026) — Windows Server · Active Directory · Kerberos

Configured Windows Server roles — FTP, DNS, DHCP — with Kerberos-based authentication/authorization and granular file permissions.

EDUCATION

ESPRIM Monastir — Engineering Degree, Cybersecurity & Cloud Computing (2024 – 2027) · top of class · expected graduation June 2027

ISiMa Mahdia — BSc, Software Engineering (2021 – 2024) · with highest honours

Lycée Tahar Sfar, Mahdia — Baccalauréat in Mathematics (2021 – 2022)

CERTIFICATIONS

CLLMSP & CRTOM (Red Team Leaders, 2026) | Cisco CCNA 200-301 (in progress) | Full-Stack MERN (100h) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation

LANGUAGES

Arabic — native | **French** — bilingual | **English** — bilingual | **German** — basic

LEADERSHIP & COMMUNITY

- Co-founded **Hunters Club** (20+ members) — competitive CTFs across Tunisia (2nd & 4th, Polytech Sousse CTF); ambassador, CyberSphere Congress (Hammamet).
- Led the Cyber & Cloud committee at **DevTalents** (30+ members) — organized an LPIC-1 preparation session.
- **2nd place**, Clean & Green hackathon 2025 — regular hackathon participant (incl. AGEOS).
