

Mohamed Ben Naima

Graduate Software Engineer — Java · Python · Distributed & High-Performance Systems

Tunisia | +216 25 577 542 | Medbennaima2021@gmail.com | [linkedin.com/in/mohamed-ben-naima](https://www.linkedin.com/in/mohamed-ben-naima) | github.com/Mohamed-Ben-Naima | [Portfolio: mohamed-ben-naima.netlify.app](https://mohamed-ben-naima.netlify.app) | English (bilingual) | French (bilingual)

PROFILE

Graduate software engineer, graduating June 2027 (within the August 2024 – August 2027 graduate window), focused on backend, distributed and high-performance systems used in real-time markets. As a software engineering intern I am building a full-cycle industrial ERP (Spring Boot Modulith) — designing domain models, REST APIs, event-driven decoupling, caching for performance, and OAuth2/RBAC. Previously built a trading-platform backend and a microservices banking architecture with Kafka, Docker, CI/CD and observability. Solid grasp of algorithms, data structures, object-oriented design, operating systems, concurrency and relational databases; competitive problem solver (CTFs, hackathons). Highly motivated to engineer simple, well-architected solutions for capital markets; available for a full-time Graduate Software Engineer role in London after graduation (June 2027), open to relocation and visa sponsorship.

TECHNICAL SKILLS

Programming Languages: Java, Python, TypeScript/JavaScript, PHP, SQL

Algorithms & Data Structures: arrays, linked lists, trees, graphs, hash maps, recursion, Big-O analysis, competitive problem solving

Object-Oriented Design: SOLID principles, design patterns, clean code, modular monolith & microservice architecture

Operating Systems & Concurrency: Linux, Windows Server, processes & threads, memory management, locking (coursework); computer-architecture fundamentals (coursework)

Distributed Systems & Eventing: Kafka, event-driven architecture, Spring Modulith application events, Redis, Caffeine

Relational Databases: MySQL, PostgreSQL, SQL, normalization, transactions, indexing, data modeling

Backend & API Development: Spring Boot, FastAPI, Node.js/Express, REST, OpenAPI/Swagger

Networking: TCP/IP, VLANs, DNS/DHCP, Cisco (CCNA in progress), GNS3

Cloud & DevOps: AWS, OpenStack, Docker, Kubernetes, GitLab CI/CD, GitHub Actions, Render

Testing & Observability: Postman test suites, Grafana, Prometheus, Loki, Wazuh

Tools: Git, Jira, UML

WORK EXPERIENCE

Software Engineering Intern — Full-Stack, Polymaille (Textile Industry) | Ksar Hellal, Tunisia · July – September 2026 (present)

- **Building a full-cycle industrial ERP as a Spring Boot Modulith:** five domain modules sealed behind API boundaries, decoupled via application events (event-driven architecture); own the Stock & Sales modules end-to-end — domain model, event flows, REST APIs.
- **Implementing OAuth2/JWT + RBAC** (Keycloak), MySQL (Aiven), **Redis + Caffeine caching for performance**, OpenAPI/Swagger and PDF invoicing with an Angular + Tailwind frontend; deployment in progress on a Windows Server we configured.
- **Working in a 2-person team** alongside the Purchasing & Production owner; documenting every module with the business lead before delivery.

Backend / Full-Stack Developer, Alfa Computers | Mahdia, Tunisia · March 2024 – August 2025 (PFE, backend, IoT mobile)

- **Built a trading-platform backend** with authenticated REST endpoints (FastAPI, JWT + OAuth2, OpenAPI/Swagger, Postman test suites) — strong interest in financial markets and trading systems.
- **Delivered a MERN e-commerce** solo (React, Node.js, Express, MongoDB) — Dockerized, GitLab CI/CD, deployed on Render.
- **Led a 3-person team** shipping a smart-home app streaming live Arduino sensor data (React Native + Node.js/Express).

PROJECTS

Secured Banking Infrastructure (2026) — GNS3 · Cisco · OpenStack · Spring Boot · Angular · Kafka · pfSense · Wazuh · Grafana · Prometheus · Loki · GitHub Actions · AWS

- **Deployed a microservices banking app** (Spring Boot, Angular, Kafka — one database per service) on an OpenStack private cloud; CI/CD auto-deploy + AWS golden-image pipeline; observability stack; KYC module in JWT/RBAC. **Nominated, ESPRIT Projects Ball.**

Hermes — MERN E-commerce Platform (2024 – present) — React · Node.js · Express · MongoDB · Docker · Render
JWT authentication, customer/admin dashboards and PDF invoices; being matured into a multi-tenant SaaS.

Windows Server & Network Services Lab (2026) — Active Directory · Kerberos

Configured Windows Server roles (FTP, DNS, DHCP) with Kerberos authentication and granular file permissions — systems administration and operations.

EDUCATION

ESPRIM Monastir — Engineering Degree, Cybersecurity & Cloud Computing (2024 – 2027) · top of class · graduating June 2027

ISIMa Mahdia — BSc, Software Engineering (2021 – 2024) · with highest honours

Lycée Tahar Sfar, Mahdia — Baccalauréat in Mathematics (2021 – 2022)

CERTIFICATIONS

Cisco CCNA 200-301 (in progress) | CLLMSP & CRTOM (Red Team Leaders) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation

LANGUAGES

Arabic — native | **French** — bilingual | **English** — bilingual | **German** — basic

LEADERSHIP

- Co-founded **Hunters Club** (20+ members) — competitive CTFs across Tunisia; 2nd & 4th place, Polytech Sousse CTF.
- Led the Cyber & Cloud committee at **DevTalents** (30+ members) — organized an LPIC-1 preparation session.
- **2nd place**, Clean & Green hackathon 2025 — regular hackathon participant (incl. AGEOS).

AVAILABILITY

Available immediately after graduation (June 2027) for a full-time Graduate Software Engineer role in London; open to relocation and visa sponsorship.
