

Mohamed Ben Naima

DevSecOps & Cloud Security Engineering Student

End-of-Studies Internship (PFE) · available January 2027 Tunisia

+216 25 577 542 · Medbennaima2021@gmail.com · linkedin.com/in/mohamed-ben-naima · github.com/Mohamed-Ben-Naima · mohamed-ben-naima.netlify.app

■ PROFILE

Cybersecurity & Cloud Computing engineering student (top of class) who builds security into the software lifecycle: OWASP-hardened Spring Boot back ends, CI/CD with secrets management, Docker/Kubernetes on hybrid cloud, segmented networks and SIEM monitoring, with controls aligned to ISO/IEC 27001:2022. Securinets member and CTF player.

■ SECURITY HIGHLIGHTS

4 / 10 OWASP Top 10 risks mitigated in an ERP: A01, A03, A07, A09	5 zones segmented network: DMZ, admin, front, back, DB, plus bastion host	100% of hosts shipping logs to a centralized Wazuh SIEM	0 manual steps: GitHub Actions build and deploy to AWS
---	---	---	--

■ TECHNICAL SKILLS

AppSec & Standards	OWASP Top 10, ISO/IEC 27001:2022 (Annex A), secure coding, Spring Security, JWT, OAuth2, OpenID Connect, BCrypt, RBAC / least privilege, input validation, audit logging
CI/CD & Automation	GitHub Actions, GitLab CI/CD, secrets management (GitHub Secrets, SSH keys), Bash scripting, Git
Containers & Cloud	Docker, Kubernetes, Nginx, AWS (EC2), OpenStack private cloud, hybrid cloud deployment
Identity & Access (IAM)	Keycloak (SSO, OIDC), Active Directory, Kerberos
Network Security	pfSense firewalls, DMZ, network segmentation, bastion host, Cisco / Nexus switching & routing, VLANs, DNS/DHCP, GNS3
Monitoring & SIEM	Wazuh (agents, centralized log collection), Grafana, Prometheus, Loki, Wireshark
Languages & Stack	Java, Python, Bash, JavaScript/TypeScript, SQL · Spring Boot, FastAPI, Node.js, Angular, React · PostgreSQL, MySQL, MongoDB, Kafka · Ubuntu, Kali Linux, Windows Server

■ EXPERIENCE

Software Engineering Intern, Secure Back-End (ERP) Jul – Sep 2026
Polymaille (Textile Industry) · Ksar Hellal, Tunisia

- **Built a full-cycle ERP replacing a legacy system** as a Spring Boot Modulith with 4 business modules (purchase, stock, production, sales): supplier orders, approval workflow, delivery notes, invoices and payments; each module scoped with the business lead and validated with users.
- **Implemented authentication and authorization with Spring Security:** stateless JWT filter, BCrypt password hashing and 5 roles enforced by method-level RBAC (@PreAuthorize) under least privilege, addressing OWASP A01 (Broken Access Control) and A07 (Authentication Failures); aligned with ISO 27001 A.5.15 / A.8.5.
- **Prevented injection (OWASP A03)** with Bean Validation and parameterized JPA queries, and **built a persistent audit trail** (who approved what, and when) on orders, invoices and payments for traceability and non-repudiation (OWASP A09, ISO 27001 A.8.15).

Full-Stack / Backend Developer (3 internships) Mar 2024 – Aug 2025
Alfa Computers · Mahdia, Tunisia

- **Built "The Hive" trading platform backend** with fully authenticated REST endpoints (FastAPI, JWT + OAuth2), documented in OpenAPI/Swagger and covered by Postman test suites.
- **Delivered a MERN e-commerce platform solo**, containerized with Docker and auto-deployed through GitLab CI/CD to Render; **led a 3-person team** shipping an IoT smart-home app.

■ PROJECTS

Secured Banking Infrastructure (team of 6) 2026
GNS3 · Cisco Nexus · pfSense · Wazuh · Keycloak · OpenStack · AWS · GitHub Actions · Spring Boot · Kafka

- **Designed a defense-in-depth network in GNS3 with 5 security zones** (DMZ, administration, front-end, back-end, database): Cisco Nexus switches, routers, pfSense firewalls, bastion host for admin access, Nginx reverse proxy, DNS/DHCP (ISO 27001 A.8.20 / A.8.22).
- **Deployed a centralized SIEM:** a Wazuh agent on every host, with logs forwarded through a collector to the central manager (ISO 27001 A.8.15 / A.8.16).
- **Automated deployment with GitHub Actions** to a hybrid cloud (OpenStack in GNS3 + AWS): the pipeline builds the Spring Boot JAR, pulled by the AWS VM over SSH with keys kept in GitHub Secrets; no manual deploy steps left.
- **Owned the KYC module** of a 7-microservice banking app (database per service, Kafka eventing) secured with Keycloak SSO (OpenID Connect) and RBAC. **Nominated, ESPRIT Projects Ball.**

Hermes Suite, E-commerce Platform (MERN) 2024 – present
JWT-secured e-commerce (catalogue, cart, orders, PDF invoices), evolving into a multi-tenant SaaS. React · Node.js · MongoDB Atlas · Docker · Render

■ EDUCATION

ESPRIM Monastir	2024 – 2027
Engineering Degree, Cybersecurity & Cloud Computing · Top of class	
ISIMa Mahdia	2021 – 2024
BSc, Software Engineering · Highest honours	

■ LANGUAGES

Arabic native · French bilingual · English bilingual · German basic

■ CERTIFICATIONS

CLLMSP & CRTOM (Red Team Leaders, 2026) · Cisco CCNA 200-301 (in progress) · Full-Stack MERN (100h) · Building AI Agents (DeepLearning.AI)

■ SECURITY COMMUNITY

- Member of **Securinets**; CTF player on TryHackMe, picoCTF and Tunisian CTFs. Co-founded **Hunters Club** (20+ members): 2nd & 4th place at Polytech Sousse CTF; ambassador, CyberSphere Congress (7th ed.).
