

# Mohamed Ben Naima

## Full-Stack Developer | Cybersecurity & Cloud Computing Engineer

Tunisia | +216 25 577 542 | Medbennaima2021@gmail.com | [linkedin.com/in/mohamed-ben-naima](https://www.linkedin.com/in/mohamed-ben-naima) | [github.com/Mohamed-Ben-Naima](https://github.com/Mohamed-Ben-Naima) | [Portfolio: mohamed-ben-naima.netlify.app](https://mohamed-ben-naima.netlify.app) | English (bilingual) | French (bilingual)

## PROFILE

Full-stack software engineer specialized in cybersecurity and cloud computing, building production-grade systems — secure web platforms, industrial ERPs, and cloud-deployed infrastructure. Core stack: Angular, React, Python (FastAPI), Node.js, backed by SQL/NoSQL data modeling, end-to-end authentication (JWT, OAuth2, RBAC), and cloud delivery (Docker, Kubernetes, OpenStack, AWS). Now building a complete industrial ERP as an engineering intern while transforming my MERN e-commerce platform — built at ISIMa (graduated with highest honours) — into a multi-tenant SaaS with a richer user/admin experience and smart, user-friendly features.

## TECHNICAL SKILLS

**Languages:** Python, JavaScript/TypeScript, Java, PHP, SQL

**Frontend:** Angular, React, React Native, Tailwind CSS, HTML/CSS

**Desktop:** JavaFX

**Backend & APIs:** FastAPI, Node.js/Express, Spring Boot, Symfony, REST, Swagger/OpenAPI

**Databases:** MySQL, PostgreSQL, MongoDB, Oracle

**Auth & Security:** JWT, OAuth2, RBAC, Keycloak

**Architecture Patterns:** modular monolith (Spring Modulith), microservices, event-driven design

**Cloud & DevOps:** Docker, Kubernetes, GitLab CI/CD, GitHub Actions, OpenStack, AWS, Render

**Networking:** Cisco switching, pfSense, VLANs, DNS/DHCP, Wireshark

**OS:** Ubuntu, Kali, Windows Server

**Observability:** Grafana, Prometheus, Loki, Wazuh, Kafka

**Tools:** Git, Postman, Jira, UML, Agile (SCRUM / KANBAN)

## EXPERIENCE

**Software Engineering Intern — Full-Stack, Polymaille (Textile Industry)** | Ksar Hellal, Tunisia · Jul – Sep 2026 (present)

- **Building a full-cycle ERP as a Spring Boot Modulith** (modular monolith) for Microtiss Confect — covering purchase, stock, production and sales — supplier orders, approval workflow, delivery notes, invoices and payments — one trusted source of truth across four business cycles, with deployment in progress on a team-configured Windows Server.
- **Designed the relational model & REST API**, enforcing data integrity and security through role-based access control (RBAC); warehouse, production and finance teams share the same data with granular permissions.
- **Owned scoping end-to-end** with the business lead: every module framed with the user and validated before delivery.

**Full-Stack / Backend / Mobile Developer, Alfa Computers** | Mahdia, Tunisia · Mar 2024 – Aug 2025 (PFE, IoT mobile, backend internships)

- **Built** "The Hive" trading platform backend, **serving** the web client through fully authenticated REST endpoints, **by** implementing FastAPI (Python), JWT + OAuth2, OpenAPI/Swagger and Postman test suites.
- **Delivered a complete MERN e-commerce** solo (React, Node.js, Express, MongoDB) with JWT login, catalog, cart, customer/admin dashboards, **by** containerizing with Docker and automating deploys via GitLab CI/CD to Render.
- **Led a 3-person team** (2 mobile developers + 1 IoT/hardware) to ship a smart-home app (React Native + Node.js/Express) streaming live Arduino sensor data and controlling LEDs from the phone, deployed on Render.

## PROJECTS

**Secured Banking Infrastructure (2026) — microservices · Spring Boot · Angular · Keycloak · SQL/MySQL · Kafka · OpenStack · GNS3 · AWS · GitHub Actions · Grafana · Prometheus · Wazuh**

- **Conceived a secured network architecture:** Cisco core switch, dual internal/external pfSense firewalls, edge router, Ubuntu server, VLAN segmentation, DNS/DHCP.
- **Architected a microservices banking app** (Spring Boot, Angular, Keycloak, SQL/MySQL — one database per service) on an OpenStack private cloud inside GNS3, with Kafka async eventing, CI/CD (JAR auto-deploy) and an AWS golden-image to OpenStack VM pipeline.
- **Observability** with Grafana, Prometheus, Loki, Wazuh; KYC module in JWT/RBAC. **Nominated, ESPRIT Projects Ball.**

**Hermes Suite — E-commerce Platform (MERN) (2024 – present) — React · Node.js · Express · MongoDB Atlas · Render · Netlify**  
Full MERN e-commerce platform — product catalogue, cart, checkout, orders, PDF invoices — built at ISIMa, now being matured into a multi-tenant SaaS with an enhanced user/admin experience and smart, user-friendly features.

**MiraviaSpace — Travel & Social Platform (team of 6) (2025) — Symfony · Oracle · JavaFX · In-house AI chatbot (MiraBot)**

Owned the entire client side: account creation/login, client dashboard, search across flights/hotels/cars/offers, and local-immersion flows (volunteering, events, activities). **Runner-up, ESPRIT Projects Ball.**

**Windows Server & Network Services Lab (academic) (2026) — Windows Server · Active Directory · Kerberos**

Configured Windows Server roles — FTP, DNS, DHCP — with Kerberos-based authentication/authorization and granular file permissions.

## EDUCATION

**ESPRIM Monastir** — Engineering Degree, Cybersecurity & Cloud Computing (2024 – present) · top of class

**ISIMa Mahdia** — BSc, Software Engineering (2021 – 2024) · with highest honours

**Lycée Tahar Sfar, Mahdia** — Baccalauréat in Mathematics (2021 – 2022)

## CERTIFICATIONS

CLLMSP & CRTOM (Red Team Leaders, 2026) | Cisco CCNA 200-301 (in progress) | Full-Stack MERN (100h) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation

## LANGUAGES

**Arabic** — native | **French** — bilingual | **English** — bilingual | **German** — basic

## LEADERSHIP & BEYOND WORK

- Co-founded **Hunters Club** (20+ members) — CTFs across Tunisia; 2nd & 4th place at Polytech Sousse CTF; ambassador for CyberSphere Congress (Hammamet, 7th ed.); ran an n8n automation workshop for students.
- Led the Cyber & Cloud committee at **DevTalents** (30+ members) — organized an LPIC-1 preparation session
- **2nd place**, Clean & Green hackathon 2025 — regular participant in hackathons across Tunisia (incl. AGEOS)
- Former lifeguard (Mouradi hotel), barista, waiter and construction worker — teamwork and calm under pressure
