

Mohamed Ben Naima

Cybersecurity & Cloud Computing Engineering Student — Governance, Risk & Compliance (GRC)

Tunisia | +216 25 577 542 | Medbennaima2021@gmail.com | [linkedin.com/in/mohamed-ben-naima](https://www.linkedin.com/in/mohamed-ben-naima) | github.com/Mohamed-Ben-Naima | [Portfolio: mohamed-ben-naima.netlify.app](https://mohamed-ben-naima.netlify.app) | English (bilingual) | French (bilingual)

PROFILE

Cybersecurity engineering student with hands-on experience in access governance, supplier/approval workflows and secure infrastructure. As an engineering intern I am building a full-cycle industrial ERP — designing role-based access control (RBAC) under least-privilege principles, working on third-party supplier processes, and documenting every business process end-to-end. Outside work I co-founded a CTF club, run security workshops and training sessions, and design segmented network architectures with firewalls and monitoring. Analytical, documentation-driven, fluent in English and French; motivated to support third-party security assessments, scorecard monitoring, risk analytics and security-awareness initiatives.

TECHNICAL SKILLS

Access Control & Identity (IAM): RBAC & least-privilege design, OAuth2, JWT, Keycloak, Active Directory, Kerberos

Data & Analytics: MySQL, SQL, PostgreSQL, MongoDB, data modeling, single-source-of-truth reporting

Security & Risk Analysis: attack-surface analysis, CTFs, Wireshark, Wazuh, Kali Linux, OpenAPI security

Third-Party & Process: supplier orders & approval workflows, process documentation, UML, business-user scoping

Networks & Infrastructure: Cisco switching, pfSense firewalls, VLAN segmentation, DNS/DHCP, Windows Server, Ubuntu, GNS3, OpenStack

Cloud & DevOps: Docker, Kubernetes, AWS, GitLab CI/CD, GitHub Actions, Render

Tools: Git, Jira, Postman, Grafana, Prometheus, Loki

EXPERIENCE

Software Engineering Intern — Full-Stack, Polymaille (Textile Industry) | Ksar Hellal, Tunisia · July – September 2026 (present)

- **Designing role-based access control (RBAC)** with granular permissions so warehouse, production and finance teams share the same data under least-privilege principles — access governance across four business cycles (purchase, stock, production, sales).
- **Working on supplier orders and approval workflows** (third-party procurement) inside a full-cycle ERP (Microtiss Confect) — one trusted source of truth with strict data integrity, deployment in progress on a team-configured Windows Server.
- **Documenting every module end-to-end** with the business lead: processes framed with the user and validated before delivery — hands-on process documentation and stakeholder communication.

Full-Stack / Backend / Mobile Developer, Alfa Computers | Mahdia, Tunisia · March 2024 – August 2025 (PFE, IoT mobile, backend internships)

- **Built "The Hive"** trading platform backend with fully authenticated REST endpoints (FastAPI, JWT + OAuth2, OpenAPI/Swagger, Postman test suites).
- **Delivered a complete MERN e-commerce** solo (React, Node.js, Express, MongoDB) with JWT login, customer/admin dashboards, Docker and GitLab CI/CD.
- **Led a 3-person team** (2 mobile + 1 IoT/hardware) shipping a smart-home app (React Native + Node.js/Express) streaming live Arduino sensor data, deployed on Render.

PROJECTS

Secured Banking Infrastructure (2026) — GNS3 · Cisco · OpenStack · Spring Boot · Angular · Kafka · pfSense · Wazuh · Grafana

- **Conceived a secured network architecture:** Cisco core switch, dual internal/external pfSense firewalls, edge router, VLAN segmentation, DNS/DHCP.
- **Deployed a microservices banking app** on an OpenStack private cloud inside GNS3 with observability (Grafana, Prometheus, Loki, Wazuh) and a KYC module in JWT/RBAC. **Nominated, ESPRIT Projects Ball.**

Windows Server & Network Services Lab (2026) — Windows Server · Active Directory · Kerberos

Configured Windows Server roles — FTP, DNS, DHCP — with Kerberos-based authentication/authorization and granular file permissions.

Hermes Suite — E-commerce Platform (MERN) (2024 – present) — React · Node.js · MongoDB · Docker · Render

Full MERN e-commerce with JWT authentication and customer/admin dashboards, being matured into a multi-tenant SaaS.

EDUCATION

ESPRIM Monastir — Engineering Degree, Cybersecurity & Cloud Computing (2024 – present) · top of class

ISIMa Mahdia — BSc, Software Engineering (2021 – 2024) · with highest honours

Lycée Tahar Sfar, Mahdia — Baccalauréat in Mathematics (2021 – 2022)

CERTIFICATIONS

CLLMSP & CRTOM (Red Team Leaders, 2026) | Cisco CCNA 200-301 (in progress) | Full-Stack MERN (100h) | Building AI Agents (DeepLearning.AI) | n8n Workflow Automation

LANGUAGES

Arabic — native | **French** — bilingual | **English** — bilingual | **German** — basic

LEADERSHIP, AWARENESS & COMMUNITY

- Co-founded **Hunters Club** (20+ members) — CTFs across Tunisia; 2nd & 4th place at Polytech Sousse CTF; ambassador for CyberSphere Congress (Hammamet, 7th ed.); ran an n8n automation workshop for students.
- Led the Cyber & Cloud committee at **DevTalents** (30+ members) — organized an LPIC-1 preparation session.
- **2nd place**, Clean & Green hackathon 2025 — regular participant in hackathons across Tunisia (incl. AGEOS).
